

## Echidna Production Machinery

### Selection Guide for Echidna Cutting Attachments

The following table provides a quick guide for selecting the equipment best suited for your cutting needs, considering the types of material that you may want to cut. Remember there are other considerations such as cutting speeds, width of cut and cutting depth.

	Compressive Strength Mpa <sup>1</sup>	Description	Stump Grinder	Rock Grinder	Carbide Tipped Saw	Diamond Saw	Special Equipment <sup>2</sup>
		Softwood	✓	✓			✓
		Hardwood	✓	✓			✓
		Gypsum		✓	✓		✓
		Siltstone		✓	✓	✓	✓
		Slate		✓	✓	✓	✓
	30	Limestone		✓	✓	✓	✓
	52	Marble		✓	✓	✓	✓
	30-70	Sandstone		✓	✓	✓	✓
		Asphalt		✓		✓	✓
		Concrete		✓		✓	✓
		Dolomite				✓	✓
	131	Granite				✓	✓
	140	Quartzite				✓	✓
	224	Basalt				✓	✓
		Copper					✓
		Steel					✓

<sup>1</sup> Values provide for these materials are indicative only

<sup>2</sup> We can design special equipment to cut any of these materials. It is unlikely to be practical to design a single machine to cut all of the materials.
